SUMMARY

Entry-level cybersecurity professional with a B.Tech in Computer Technology and hands-on experience in vulnerability assessment, penetration testing, web application security, and security reporting. Skilled in Kali Linux, Burp Suite, Nmap, and Metasploit, with knowledge of OWASP Top 10 vulnerabilities, CVE research, risk assessment, and remediation. Seeking an entry-level role in cybersecurity analysis, VAPT, penetration testing, web security, SOC operations, or security operations.

TECHNICAL SKILLS

- Operating Systems: Kali Linux, Linux, Windows
- Security Tools: Burp Suite, Nmap, Metasploit, Hydra, Gobuster, Wireshark, Splunk
- Offensive Security: Web Application Penetration Testing, Vulnerability Assessment, Reconnaissance, SQL Injection, XSS, CSRF, SSRF, Authentication Testing, File Upload Testing
- Defensive Security & SOC: Security Monitoring, Log Analysis, Threat Detection, Incident Response Fundamentals, SIEM Concepts, Alert Triage, Network Traffic Analysis, Indicator of Compromise (IOC) Analysis
- Networking: TCP/IP, HTTP/HTTPS, DNS, SSH, OSI Model, Common Network Protocols
- Programming/Scripting: Python, Java, MySQL
- Security Frameworks & Reporting: OWASP Top 10, CVE Research, Vulnerability Reporting, Proof-of-Concept Documentation

EDUCATION

Bachelor of Technology (B.Tech), Computer Technology - CGPA: 7.39
Priyadarshini College of Engineering, Nagpur

2022-2026

PROJECTS

1. Vulnerability Assessment Report - PortSwigger Web Security Academy

- Studied and analyzed web application vulnerabilities through hands-on labs covering SQL injection, XSS, CSRF, DOM-based vulnerabilities, SSRF, insecure file uploads, API security, and other OWASP Top 10 risks.
- Developed an understanding of vulnerability root causes, exploitation techniques, business impact, and secure coding practices.
- Documented lab solutions with attack workflows, proof-of-concept steps, risk assessments, and mitigation recommendations.

2. Vulnerability Assessment Report- DVWA & OWASP Juice Shop

- Performed practical vulnerability assessments on DVWA and OWASP Juice Shop in a controlled lab environment.
- Identified and validated vulnerabilities such as SQL injection, XSS, CSRF, authentication weaknesses, insecure direct object references, command injection, and access-control issues.
- Used Burp Suite, Nmap, Gobuster, and Kali Linux for reconnaissance, request analysis, enumeration, and vulnerability testing.
- Prepared structured security reports containing vulnerability descriptions, affected areas, exploitation steps, proof-of-concept evidence, severity, impact, and remediation recommendations.

3. Web Security Scanner

- Developed a web-based vulnerability scanner to identify common web security issues, including SQL injection, XSS, clickjacking, and exposed directories.
- Integrated a vulnerability-scanning API to automate security testing across target web applications.
- Generated structured reports containing vulnerability details, severity ratings, impact, and recommended remediation steps.

WORK EXPERIENCE

Cyber Security Intern — The Drop Organization (DCSC Internship) May 2026 – July 2026

- Conducted vulnerability assessments and penetration testing (VAPT) on web applications and Linux-based lab environments using Kali Linux, Burp Suite, Nmap, Metasploit, Hydra, and Gobuster.
- Performed reconnaissance, enumeration, vulnerability validation, and CVE research to assess security risks and potential impact.
- Practiced defensive security fundamentals, including security monitoring, log analysis, threat identification, incident response concepts, and remediation planning.
- Prepared technical reports and proof-of-concept (PoC) documentation with vulnerability details, severity ratings, evidence, impact, and recommended mitigation steps.

CERTIFICATE

- Cyber Security Internship Certificate — The Drop Organization (July 2026)
- DROP Certified Security Course (DCSC) — The Drop Organization (Feb 2026)
- CyberOps Associate — Cisco Networking Academy
