

Yash Wadbude

Penetration Tester & Ethical Hacker

EDIT ME: Replace public/assets/resume.pdf with your real resume.

About

This is a placeholder resume file so the 'Resume' button works out of the box. Swap this file out with your real PDF resume, keeping the same filename (public/assets/resume.pdf), or update 'resumeFile' in data/config.json.

Sections to include in your real resume

- Contact details (email, phone, location, LinkedIn, GitHub)
- Summary of your offensive-security focus and experience
- Certifications (CEH, OSCP, eJPT, etc.)
- Skills (tools, languages, methodologies)
- Work experience / engagements
- Education
- Notable projects, CTFs, or writeups
